spoligotyping, Typing of mycobacteria using spoligotyping: *editorial*, **329**
sputum, IgG subclasses in the serum and sputum from patients with bronchiectasis, **463**
sputum induction, Effect of repeated sputum induction on cell counts in normal volunteers, **87**
Sputum induction to assess airway inflammation: is it an inflammatory stimulus?: *editorial*, **79**
SRC-1, Role of transcription factors in inflammatory lung diseases: *review*, **601**
steroids, Fluticasone propionate induced alterations to lung function and the immunopathology of asthma over time, **753**
streptokinase, Use of fibrinolytic agents in the management of complicated parapneumonic effusions and empyemas, **S65 (Suppl 2)**
stress, Review of psychosocial stress and asthma: an integrated biopsychosocial approach : *review*, **1066**
substance P, Neurokinin A is the predominant tachykinin in human bronchoalveolar lavage fluid in normal and asthmatic subjects, **357**
surgery, Surgery for combined type small cell lung carcinoma, **450**
Surgery for lung cancer: *editorial*, **441**
surgical resection rate, Improving surgical resection rate in lung cancer, **445**
survey, Survey of non-invasive ventilation (NIPPV) in patients with acute exacerbations of chronic obstructive pulmonary disease (COPD) in the UK, **863**
survival, Idiopathic pulmonary fibrosis: survival in population based and hospital based cohorts, **469**
swine dust, Exposure of healthy volunteers to swine house dust increases formation of leukotrienes, prostaglandin D_2, and bronchial responsiveness to methacholine, **1041**
Induction of IL-8 production in human alveolar macrophages and human bronchial epithelial cells in vitro by swine dust, **260**
syngamosis, Human syngamosis: the first case in Korea, **717**

T cells, Inhibition of T cell proliferation by human alveolar macrophages: *letter*, **437**
telomerase, Telomerase activity in human pleural mesothelioma, **915**
theophylline, Effects of theophylline and ipratropium bromide on exercise performance in patients with stable chronic obstructive pulmonary disease, **269**
thoracoscopy, Videothoracoscopic treatment of oesophageal leiomyoma, **190**
thorax neoplasms, Current role of positron emission tomography in thoracic oncology: *review*, **703**
tobacco, Tobacco advertising ban in Europe: *letter*, **328**
tolerance, Effect of an inhaled glucocorticosteroid on mast cell and smooth muscle β_2 adrenergic tolerance in mild asthma, **110**
tracheal epithelium, Injury to murine airway epithelial cells by pollen enzymes, **368**
tracheomalacia, A vibrating trachea, **230**
tracheopathia osteochondroplastica, Tracheal botryomycosis in a patient with tracheopathia osteochondroplastica, **73**
transplantation, Heart lung transplantation in a patient with end stage lung disease due to common variable immunodeficiency, **622**
TRAP assay, Telomerase activity in human pleural mesothelioma, **915**
treatment, BTS Recommendations to respiratory physicians for organisimg the care of patients with lung cancer, **S1 (Suppl 1)**
Evaluation and outcome of patients with chronic non-productive cough using a comprehensive diagnostic protocol, **738**
Management of persistent dry cough: *editorial*, **723**
New therapies for chronic obstructive pulmonary disease: *review*, **137**
Pathophysiology and treatment of Cheyne-Stokes respiration: *review*, **514**
tuberculosis, Chemotherapy and management of tuberculosis in the United Kingdom: recommendations 1998, **536**
Genetic susceptibility to tuberculosis in human populations: *review*, **588**
Genetics and tuberculosis: *letter*, **1095**
Genetics of drug resistant tuberculosis: *review*, **793**
Geographical distribution of tuberculosis notifications in national surveys of England and Wales in 1988 and 1993: report of the Public Health Laboratory Service/British Thoracic Society/ Department of Health Collaborative Group, **176**
Mycobacterium tuberculosis DNA in tissues affected by sarcoidosis, **871**
Rifampicin containing antituberculosis medication: *letter*, **1002**
tuberculosis transmission, Pulmonary tuberculosis in Harare, Zimbabwe: analysis by spoligotyping, **346**
tumour marker, Serum KL-6 level as a monitoring marker in a patient with pulmonary alveolar proteinosis, **809**

UK, Updating UK estimates of age, sex and period specific cumulative constant tar cigarette consumption per adult, **875**
urban-rural differences, Prevalence of exercise induced bronchospasm in Kenyan school children: an urban-rural comparison, **919**
urokinase, Use of fibrinolytic agents in the management of complicated parapneumonic effusions and empyemas, **S65 (Suppl 2)**

venous access device, Totally implantable venous access devices in children with cystic fibrosis: incidence and type of complications, **285**
ventilator-associated pneumonia, Cross-colonisation with *Pseudomonas aeruginosa* of patients in an intensive care unit, **1053**
virus, In search of a cause of cryptogenic fibrosing alveolitis (CFA): one initiating factor or many?, **S3 (Suppl 2)**
Pathogenesis of lower respiratory tract infections due to *Chlamydia*, *Mycoplasma*, *Legionella* and viruses: *review*, **302**
viruses, Viruses and asthma exacerbations: *editorial*, **913**

weight loss, Influence of excessive weight loss after gastroplasty for morbid obesity on respiratory muscle performance, **39**
wheeze, A vibrating trachea, **230**
women, Sleep apnoea in women, **S12 (Suppl 3)**

young adults, Individual allergens as risk factors for bronchial responsiveness in young adults, **662**

Zimbabwe, Pulmonary tuberculosis in Harare, Zimbabwe: analysis by spoligotyping, **346**
